

Nouha Mkhinini

SOC Analyst | Blue Team & Detection Engineering

nouha.mkhinini@gmail.com · [linkedin.com/in/nouha-mkhinini](https://www.linkedin.com/in/nouha-mkhinini) · nouha-mkhinini-portfolio.netlify.app · Canadian work permit – expected Q3 2026

Summary

SOC Analyst with hands-on experience in SIEM engineering (Wazuh, Splunk, Elastic), alert triage, and detection rule authoring aligned to MITRE ATT&CK. Bilingual English/French – a direct advantage for Canadian SOC and MDR environments. Holds CompTIA Security+, Cisco CyberOps Associate, and CCNA; completed a TPN+ (Trusted Partner Network) compliance deployment in a production studio environment. Seeking L1/L2 SOC or MDR analyst roles in Canada.

Core Competencies

SIEM & Monitoring: Wazuh · Splunk · Elastic (ELK) · Security Onion

Detection & Response: MITRE ATT&CK mapping · Sigma rules · Atomic Red Team · Alert triage & tuning · Suricata IDS · Incident containment

Network Security: VLANs · VPNs · Sophos Firewall · Active Directory · RBAC · Access Control

Scripting & Tools: Python · Metasploit · Kali Linux · Windows & Linux administration

Compliance: TPN+ (Trusted Partner Network) · Security audit documentation

Professional Experience

IT Network & Security Administrator | Di Vista Design – Sousse, Tunisia

Mar 2025 – Present

- Administered and hardened 50+ endpoints and POS systems; achieved 90% SLA compliance on incident resolution through structured triage and documented runbooks – authored 3 response playbooks now used by the team.
- Managed LAN/Wi-Fi infrastructure across the office, maintaining 99%+ uptime through proactive fault detection and rapid remediation.
- Enforced patch management, backup scheduling, and RBAC across all endpoints; eliminated a backlog of unpatched critical vulnerabilities within the first 60 days.
- Reduced recurring incident volume by addressing 20+ systemic issues through root-cause fixes and improved internal documentation, cutting onboarding time for new hires.

Cybersecurity Intern (Hybrid) | Vision Age VFX – Sousse, Tunisia

Feb 2025 – Jun 2025

- Led risk assessment across 50+ endpoints as part of the studio's first TPN+ (Trusted Partner Network) compliance initiative – a media-industry security certification required by major Hollywood studios.
- Designed and deployed secure network architecture: Sophos Firewall configuration, VLAN segmentation, site-to-site VPN, and Active Directory integration for 50+ users.
- Built a Python pipeline to parse and normalize compliance telemetry into TPN+-formatted audit reports, reducing reporting effort by ~70% and enabling on-time submission of the studio's inaugural assessment.

Cybersecurity Project

Detection-as-Code SOC Pipeline | Splunk, Wazuh, Elastic, Sigma Rules

github.com/nouham/detection-as-code

- Authored Sigma-compatible detection rules covering MITRE ATT&CK techniques T1059 (command-line abuse), T1078 (valid accounts), and T1110 (brute force); validated against adversary simulations using Atomic Red Team.
- Built end-to-end SOC pipeline: log ingestion from Windows and Linux hosts → Suricata IDS → Wazuh/Elastic SIEM → alert triage and incident investigation in Security Onion.
- All detection rules, lab setup, and findings documented publicly – linked from portfolio and LinkedIn.

Education

Master's Degree in Cybersecurity | Higher Institute of Computer Science and Communication Technologies – 2025

Bachelor's Degree in ICT | Higher Institute of Computer Science and Communication Technologies, Sousse – 2023

Certifications & Languages

Certifications: Cisco CyberOps Associate · CompTIA Security+ · CCNA · Microsoft SC-200 / Security Operations Analyst (Azure Sentinel) – in progress.

Languages: English (C1) · French (B2) · Arabic (native)
